

WHEN WAS THE LAST TIME YOU HAD YOUR OIL BOILER SERVICED?

SIGNS THAT IT MAY NEED SERVICING:

- ☹ Black smoke or a build-up of soot - this prevents the boiler from burning oil efficiently
- ☹ A yellow or brown staining around or on the boiler
- ☹ Increased condensation inside windows
- ☹ More frequent requirements for oil tank fill ups
- ☹ Strong smell of oil from the boiler

AN OIL BOILER SERVICE WILL:

- 😊 Replace burner nozzle
- 😊 Clean the blast tube and heat exchanger
- 😊 Check / test solenoid, photocell and oil pump pressure
- 😊 Clean, lubricate & adjust controls as required (incl motor and fan)
- 😊 Check all boiler seals & joints
- 😊 Test the CO / CO2 ratio and adjust inline with manufacturers instructions
- 😊 Test flue gas temperature
- 😊 An annual oil boiler service will not only ensure your boiler is working safely but will ensure your boiler is working efficiently – saving you £££!

SERVICING FROM £65 EX VAT

FOR ALL YOUR OIL AND GAS SERVICING, REPAIR AND INSTALLATION NEEDS
